

REMARKS

Reconsideration of the present application as amended is respectfully requested.

In the Office Action, the Examiner rejected under 35 U.S.C. §112, second paragraph, claims 1-10 as being indefinite since claims 1 and 10 include the terms "operably" and "substantial". Applicant respectfully traverses this rejection. However, to expedite allowance of the present application, claims 1 and 10 have been amended to delete the informality noted by the Examiner. Further, claims 14-15 were amended to improve readability thereof, and claim 13 has been cancelled without prejudice.

The claims were not amended in order to address issues of patentability and Applicant respectfully reserves all rights they may have under the Doctrine of Equivalents. Applicant furthermore reserves their right to reintroduce subject matter deleted herein at a later time during the prosecution of this application or continuing applications.

It is respectfully submitted that amended claims 1 and 10 particularly point out and distinctly claim the subject matter

which applicant regards as the invention. Accordingly, withdrawal of the rejection to claims 1-10 under 35 U.S.C. §112, second paragraph, is respectfully requested.

In the Office Action, the Examiner indicated that claims 17-20 are allowed. Applicant gratefully acknowledges the indication that claims 17-20 are allowed. Further, by means of the present amendment, independent claims 1, 11 and 21 have been amended to include features similar to those in the allowed independent claim 17. Accordingly, it is respectfully submitted that independent claims 1, 11 and 21 are in allowable form, and allowance thereof is respectfully requested.

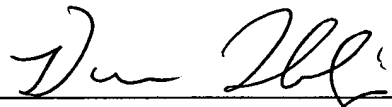

In addition, it is respectfully submitted that claims 2-10, 12, 14-16 and 22-25 should also be allowed at least based on dependence from independent claims 1, 11 and 21, as well as for the separately patentable elements contained in each of the dependent claims.

In addition, Applicant denies any statement, position or averment of the Examiner that is not specifically addressed by the foregoing argument and response. Applicant reserves the right to submit further arguments in support of the above stated position as

well as the right to introduce relevant secondary considerations including long-felt but unresolved needs in the industry, failed attempts by others to invent the invention, and the like, should that become necessary.

In view of the above, it is respectfully submitted that the present application is in condition for allowance, and a Notice of Allowance is earnestly solicited.

Respectfully submitted,

By
